

- Custom designed
- Engineered performance
- Purpose built

UPC supplies equipment that is custom designed and purpose built to ensure robust performance for an extended duration. Agitators have been supplied to many countries in various regions of the world.

AGITATORS

APPLICATIONS : -

- CIP/CIL
- Solids Suspension
- Gassing
- Reagent make up
- Lime make up and storage
- Leaching
- Conditioning

THE DIFFERENCE – agitators from UPC come with a shaft support bearing protecting the gearbox from the radial loads generated by long shafts and impellers.

UPC design and manufacture agitators in **Brisbane**, Australia. The workshop has been building mixers for the past 70 years. These are robust, high quality machines, designed to last and to perform.

Our objective is to supply these at very competitive prices.
